Investigation report

How many people became sick? _____

Common symptoms: _____

When did symptoms begin? _____

Three clues that point toward a shared source:

1. _____
2. _____
3. _____

Likely source: _____

Our claim: The evidence suggests _____

because _____

Analyze the pattern

PATTERN

What do the sick residents share? _____

What do the residents who stayed healthy share? _____

The first cases began on _____. Later cases began on _____.

What the one-day difference may tell us: _____

SEVERITY

Circle one: **mild / moderate / severe / not enough information**

Evidence for that choice: _____

RISK

Are more people at risk if the suspected source is not addressed? **Yes / No / Not enough information**

Evidence: _____

What investigators know and do not know

One fact the case supports: _____

One question that still needs testing: _____

One test or comparison that could answer it: _____

Language support

outbreak = brote · source = fuente · evidence = evidencia · symptom = síntoma · exposure = exposición · pattern = patrón
