You are a NEW cybersecurity analyst at a DFW hospital. You have access to every patient's medical records. On your second day, a coworker says: "Hey, can you quickly look up my ex's diagnosis? Nobody will know."

- **(A) Look it up.** Pros: helps a coworker, feels like a small favor, easy.
- **(B) Say no and report it.** Pros: follows rules, protects patient privacy, keeps your job.

Pros of picking A:

Pros of picking B:

My choice (A or B):

Quality list: honest / trustworthy / careful / brave / private / professional. (Or write your own.)

Which quality fits THIS choice best?

In one sentence, why is THIS quality the right one in cybersecurity — where NO ONE would find out if you looked?
