

Integrity in Cybersecurity (Sentence Stems)

NAME _____ DATE _____ PERIOD _____

Cybersecurity workers hold access that nobody is watching them use. That is why this field talks about integrity so much. Finish the sentences below. Four or five sentences total is enough.

Three real examples from class. Circle the one you will write about.

THE WORKER	WHAT THEY CAN SEE	WHAT INTEGRITY MEANS HERE
Hospital cybersecurity analyst	Every patient's diagnoses, prescriptions, and test results	Never look unless the job requires it
Bank security engineer	Every customer's account data	Never use that access for personal gain or for curiosity
Ethical hacker	The weak spots in a company's website	Report every weakness to the company right away, and never use it

Word bank. honest · trusted · private · careful · records · access · permission · report · damage · license

My Reflection

Integrity means _____

In cybersecurity, integrity matters because _____

Without integrity, a cybersecurity professional could _____

The person who gets hurt when a cybersecurity worker breaks that trust is _____, because

The Hard Question

Work ethic means doing your best even when no one is watching. Nobody pays you for the bootcamp and nobody checks it. Write one sentence about what keeps the quality up anyway.
