

IT Salary Comparison Worksheet

NAME _____ DATE _____ PERIOD _____

Pick 3 careers: **Software Developer**, **Web Developer**, and one more programming or IT career you want to know about.

My prediction, before I look anything up. The programming career that pays the MOST is _____ because _____

Compare the 3 Careers

The **DFW salary** row comes from Xello local data unless your teacher gives you a dated, verified H&L range. The other rows come from the BLS page for that career. Fill in every box.

FIELD	CAREER 1	CAREER 2	CAREER 3
Career Name			
DFW Salary (Xello or teacher-verified local range)			
BLS National Median (the pay row in Quick Facts)			
Typical Education (school needed to start)			
Job Growth Rate (the Job Outlook percent)			

Median pay is not starting pay. The median is the middle of everyone in that career, not the first paycheck.

Notes From the BLS Page

FIELD	CAREER 1	CAREER 2	CAREER 3
Number of Jobs (how many people do this now)			
What they do (one sentence from the What They Do tab)			
A DFW company that might hire this career			

Think About Your Data

1. Which career has the HIGHEST salary? Name it, then write the number.

2. Which career has the FASTEST job growth? Are they the same career?

3. Check your prediction. Look back at the top of page 1. Were you right? What surprised you?

IT Career Fit Reflection (fill in on Day 5)

1. The IT pathway I rated was _____ because

2. One fact from my salary table that changed or confirmed my thinking was

3. One IT career I reviewed was _____. It fits / does not fit me because

4. Can I see myself working in IT? Yes, no, or not sure. Use evidence from this week:
