

Health Career Evidence Check Teacher Calibration

TEACHER USE

2sw/wk4-dental-medical-billing

Score the reasoning, not the route choice

- Do not deduct for handwriting, platform route, artistic quality, accent, or English mechanics unless meaning is unclear.
- Any of the three careers may earn full credit when the recommendation fits the supplied evidence and names a meaningful trade-off.
- A Dental Hygienist recommendation can earn full credit even though it exceeds Jordan's stated preparation preference when the student names that trade-off and explains why other evidence outweighs it.
- Medical Billing and Coding is current FYF and district-coursebook content. Accept the workbook title.
- The fixed **\$50,250 / 7%** figures are the guide's May 2024 U.S. median and 2024-34 national outlook comparison data. They are not starting or DFW pay.
- Dental Assistant is below the course high-wage line but above the course growth line. One label does not decide overall career value.

Fast calibration checks

CRITERION	FULL-CREDIT EVIDENCE	COMMON REPAIR
Career data accuracy	Three complete rows; pay labels keep year, geography, and measure	Restore a missing label or correct a mixed source
Classification	Each label cites the course rule and one number or preparation fact	Add the evidence beside the label
Scenario fit	Recommendation connects preparation and duties to Jordan	Replace preference-only language with one scenario need
Evidence and trade-off	Two accurate facts plus a meaningful trade-off or verification question	Name what Jordan gains, gives up, or must verify

Feedback shorthand

- **L** = repair the label
- **E** = add evidence
- **F** = connect to Jordan's fit
- **T** = name the trade-off or verification question

Strength: _____

Fact to correct: _____

Next revision: _____
