

Website Revamp

You are the UX designer.

College and Career Exploration · Week 3 · Day 2

Bring your Find Your Future workbook (open to p. 28), a pencil, and your Chromebook (closed until we need it).

As you enter

Pick the BEST website you have ever used and the WORST one.
What made the good one good? What made the bad one bad?

Say it like this

The best site I use is _____ because I can _____ fast.
The worst is _____ because I could not find _____.

Write one of each in your notebook. Two people share.

Today you will

- 1 Learn what good and bad UX look like (p. 28).
- 2 Investigate a real practice website and catch your first reactions on sticky notes.
- 3 List 3 things that work and 5 problems, then fix 3 of them (p. 29).
- 4 Sketch a better version of one page, then finish the Rosa exit ticket.

Word of the day: UX (user experience). How a website makes you feel while you use it.

Good UX, bad UX

Find Your Future p. 28 · Step 1

Find Your Future
p. 28

Read along on p. 28

Good UX

Menus are labeled.

Buttons stand out and do what they say.

You finish in a few steps.

Bad UX

Links are hidden.

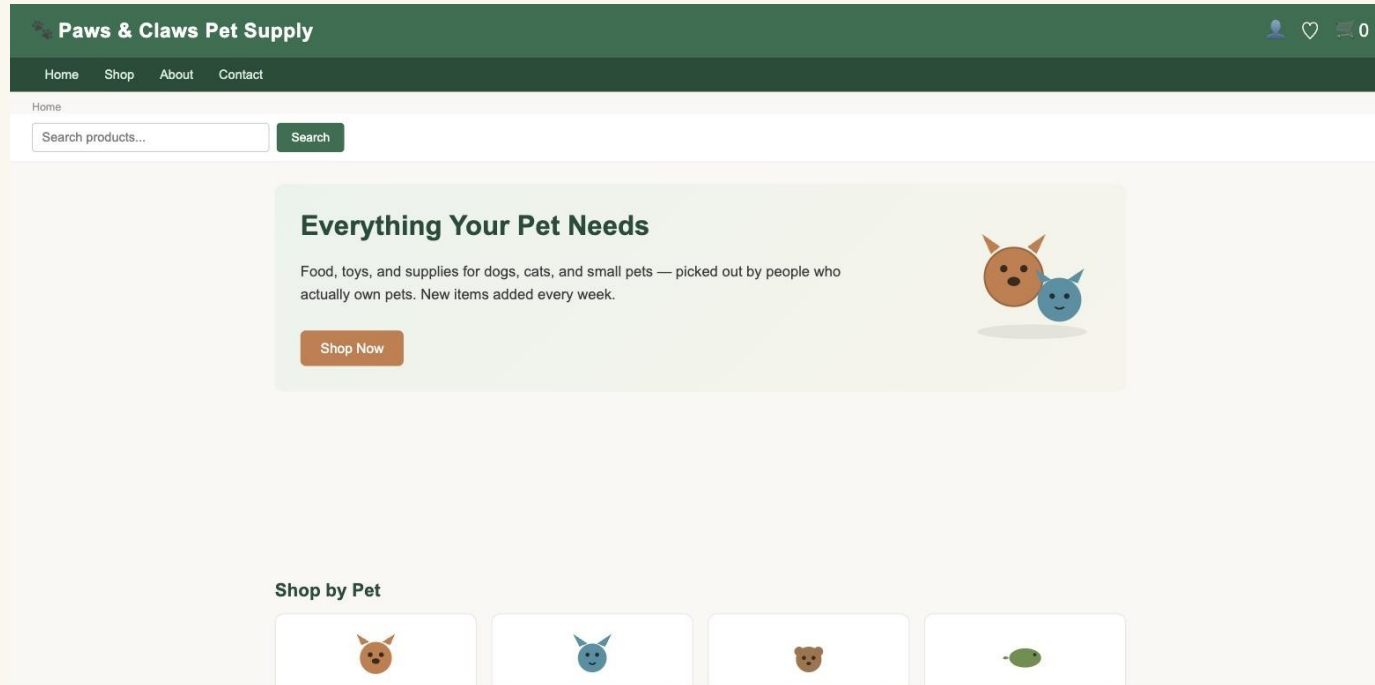

Too much stuff on the page.

Buttons with confusing names.

Broken or slow pages.

Investigate the website

Find Your Future p. 28 · Step 2 · pawsandclaws.hatsandladders.com

Paws & Claws Pet Supply. Type the address exactly. You are a customer trying to buy something.

5 minutes · Voice 0 · Chromebooks open now

Stop and Jot

90 seconds. Click around. Do not list anything yet.

One thought per sticky note.
The first thing I tried to do was _____.

I got stuck when _____.

Be a UX detective

Find Your Future p. 29 · Step 3 · Write in your workbook

Find Your Future
p. 29

3 things that work

Something a customer can do easily. Name where it is on the page.

5 problems you can see

A problem is something you can point at: a button that looks different from the others, a menu that goes nowhere, a page that is mostly empty. "It's ugly" is an opinion, not a problem.

Fix the problem

Find Your Future p. 29 · Step 4 · Choose 3 of your 5 problems

Find Your Future
p. 29

Each row needs

the problem you saw

→ your fix

→ what a user can now do

Say it like this

This helps users because they can now _____.

9 minutes · Ask your partner at Voice 1 if you are stuck on a fix

Sketch a better page

Find Your Future p. 29 · Step 5 · Plain paper

**Find Your Future
p. 29**

Pick ONE page and redraw it

Boxes and labels, not art. Show where the menu, the search, and the main button go.

Circle the fix you are proudest of and write its number from Step 4 next to it.

4 minutes · Keep the sketch. It goes in your folder with p. 29.

Finished early? Answer one Class Discussion question from p. 29 in your notebook: which improvement would make the biggest difference, and why?

Exit ticket: Rosa's tutoring site

Open the Day 2 exit ticket on the Canvas page

Rosa is 16 and just opened a small tutoring business. Her website has one long page. The "Sign Up" button is gray and sits at the very bottom, under three paragraphs about her hobbies. The menu at the top says "Stuff," "More Stuff," and "Click Here." Parents keep phoning Rosa instead of signing up online.

6 minutes · Voice 0

Open the Day 2 exit ticket

- 1 Name TWO bad UX problems. Use words from today's lists.
- 2 Pick one. Write your fix and how it helps users.
- 3 Which fix brings Rosa the most new students? Why?

Before you go

- 1 Workbook p. 29 finished: 3 strengths, 5 problems, 3 fixes.
- 2 Your sketch in your folder.
- 3 Exit ticket submitted.

Tomorrow you design an app from scratch. Bring the same workbook.
