

Canva Cybersecurity Bootcamp Flyer Rubric

TEACHER USE

1sw/wk5-cybersecurity-it

Score the final one-page flyer. FYF p. 35 is the planning space; do not require a second plan or a four-part portfolio. A teacher-approved accessible design format is scored with the same evidence criteria.

Student: _____ Period: _____ Total: _____ / 16 Date: _____

CRITERION	4 - MASTERS	3 - MEETS	2 - APPROACHES	1 - NEEDS IMPROVEMENT
Audience and event information	The title, intended audience, topic, time/place, and a safe way to sign up are clear and easy to find.	All required event information is present; one detail is hard to find or too general.	Two required details are missing or hard to understand.	The audience or event purpose is unclear, or most required details are missing.
Accurate safety teaching	The flyer gives two specific, accurate actions the audience can use to stay safer online and explains the benefit without a guarantee.	Two useful safety actions are present; one needs a clearer explanation.	One action is accurate, but another is vague, incomplete, or misleading.	Advice is mostly missing, inaccurate, or makes an unsafe promise.
Design and readability	Text hierarchy, spacing, contrast, and one relevant visual help the audience understand the message quickly.	The design is readable and organized; one choice makes a key detail less clear.	The message can be found, but crowded text, weak contrast, or an unrelated visual slows reading.	Key information is difficult to read or the layout obscures the message.
Integrity and privacy	Wording and visuals are original or credited; the sign-up path avoids personal student contact details and the flyer makes no unsupported claim.	The work is privacy-safe and mostly original or credited; one credit or claim needs clarification.	A credit or privacy detail needs repair before sharing.	The flyer copies substantial work without credit, exposes personal contact information, or makes an unsafe claim.

Gradebook Conversion

Convert the score to a percentage when entering the major grade:

SCORE	PERCENT	DISTRICT BAND
16	100	Masters
15	94	Masters

SCORE	PERCENT	DISTRICT BAND
14	88	Meets
13	81	Meets
12	75	Approaches
11	69	Needs Improvement
10	63	Needs Improvement
9 or below	Below 60	Insufficient evidence / follow campus reassessment practice

Scoring Boundaries

- The flyer is the single Major 2 submission. Do not score a portfolio, goal symbol, Evidence Log, or duplicate copy of the workbook plan.
- A teacher-approved accessible design format can earn the same score. Judge the information and design, not whether the student had uninterrupted Canva access.
- The flyer is fictional classroom work. It is not posted publicly and does not collect real sign-ups.
- Peer feedback and a revision check support instruction; score the final student work.

Reteach Triggers

- **Audience:** name one group and make the event details easy for that group to locate.
- **Safety:** replace a vague warning with two actions a participant could actually try.
- **Design:** enlarge the most important text, strengthen contrast, and remove decoration that competes with the message.
- **Integrity:** replace personal contact information with a teacher-approved sign-up path and credit reused assets.
