

Veterinary Pathway Recommendation

NAME _____

DATE _____

PERIOD _____

Decision question

Should a fictional student with an interest in animal care investigate Veterinary Science at Nimitz next? Use the week's career, pathway, triage, and skill evidence. A supported "not yet" or "no" can earn full credit.

1. Choose the current career route

Veterinary Assistant · Veterinary Technician · Veterinarian · Another animal career · Not sure yet

My current route: _____

One daily-work reason:

One education or credential trade-off:

One May 2024 U.S. median or 2024-34 outlook fact:

2. Connect the local pathway accurately

One current Nimitz Veterinary Science course, experience, or requirement that matters to this student:

What the high-school pathway can build - and what it does **not** replace:

3. Use evidence from this week’s work

What the triage case showed about critical thinking:

One transferable skill from the Xello Skills lesson and how it appears in the career:

4. Make the recommendation

My recommendation: Investigate next · Keep as one option · Choose a different route

Write four sentence jobs:

- 1. State the recommendation and the career route.
- 2. Use one education, wage, outlook, or openings fact with its label.
- 3. Connect one Nimitz pathway fact and one skill or triage example.
- 4. Name one useful next question or action.

Submission check

- ☐ Career fact uses the correct source, date, and measure.
- ☐ Local pathway fact does not promise a credential or outcome.
- ☐ Critical-thinking or transferable-skill evidence is specific.
- ☐ Recommendation includes a trade-off and a next step.
