Registered Apprenticeship — Stable Evidence

A Registered Apprenticeship is a paid job with structured on-the-job learning, related instruction, mentoring, progressive wages, and a portable industry-recognized credential.

Sponsor-specific details that must be checked: eligibility, length, wage, cost, schedule, application, screening, license relationship, and current opening.

Future apply steps:

1. Search the Apprenticeship Job Finder by occupation and location.
2. Open a current employer or sponsor listing.
3. Record eligibility, documents, location, training, wage, credential, and deadline exactly as listed.
4. Apply directly through the employer or sponsor when eligible and ready.
5. Follow the sponsor's screening and next-step instructions.

Two details I would have to verify in a real listing:

Dallas College Construction Technology Card

Current options include workforce training, credit certificates, and a Construction Technology A.A.S. Estimated time, tuition basis, campus, credit status, and transfer limits vary by route.

Future enroll steps:

- 1. Choose a current Construction Technology route.
- 2. Check campus, time, published tuition basis, credit/noncredit status, and transfer limit.
- 3. Complete the Dallas College or ApplyTexas application when ready.
- 4. Complete pre-advising and determine current TSI/exemption requirements.
- 5. Meet with an advisor/pathway specialist and register for the correct courses.

One transfer or cost limitation I would verify:

Route Comparison

EVIDENCE	REGISTERED APPRENTICESHIP	DALLAS COLLEGE ROUTE
How to start		
Paid work during route		
Cost/aid question		
Credential		
One variable or limit		

Best route for fictional Jordan and two card details that support the decision:

One advantage of the route Jordan did not choose:

Individual Exit

Two actual apply/enroll steps for one route:

1.
-
-
2.
-
-

One detail that varies and must be verified:

Organization Type Cards

TYPE	MAIN JOB	CONSTRUCTION EXAMPLE OR BOUNDARY
Union	Represents workers; may bargain or sponsor training	Not every apprenticeship is union
Professional/trade association	Connects workers or employers around a field	Associated General Contractors of America (AGC)
CTSO	Student organization connected to CTE	Current Irving Construction coursebook lists TSA
Credential body	Develops or awards credentials	NCCER is not a union or CTSO

Named association card: AGC supports student chapters at accredited two- and four-year schools with construction-related programs. A future student accesses a chapter through a participating college. AGC says chapter membership helps students observe and develop skills with industry leaders. Source accessed August 2026: AGC Student Chapters.

Selected organization: _____

Type and affiliated group:

One documented member/student value:

Classify one organization and explain one value:

Use this frame: [Organization] is a [type]. A student can access it by [step], and one documented value is [value].
