

Civil Engineering — Career and Systems Evidence

NAME _____

DATE _____

PERIOD _____

Fixed Career Evidence

FIELD	CURRENT EVIDENCE
Occupation	Civil Engineer
Work	Plans, designs, and supervises construction/maintenance of infrastructure such as roads, bridges, water, and sewage systems
Typical entry education	Bachelor's degree in civil engineering or related field
May 2024 U.S. median	\$99,590 — BLS
2024–34 outlook	5% growth; about 23,600 openings per year — BLS
Licensure boundary	Not universally required for entry-level work; generally required when providing services directly to the public or signing regulated engineering work; state routes vary

Source accessed August 2026: U.S. Bureau of Labor Statistics, Civil Engineers.

My Evidence Card

Word bank: infrastructure · route · median · licensure · public service

One work product: [_____]

One preparation requirement: [_____]

One claim the source does **not** support: [_____]

Use this frame: The source supports [evidence], but it does not prove [limit].

Engineering Cluster and Pathway

Describe what problems the Engineering cluster helps solve:

Current district-source distinction:

- MacArthur public overview: **Engineering**
- 2026–27 Irving ISD coursebook: **Civil Engineering** four-course program

How the high-school pathway can support—but not complete—the postsecondary route:

Systems Decision

Complete the cabinet plan once on FYF p. 175. Use this section only for the systems explanation.

Use this frame: When I placed [cabinet choice], it affected [second element] because [evidence]. This model does not prove [limit].

My first placement choice:

The second element affected by that choice:

Why I changed or kept the plan:

One limit of comparing this kitchen layout with a real civil-engineering project: [_____]
