

Xello Quick Sim Decision Record

NAME _____

DATE _____

PERIOD _____

Save one complete Quick sim

Open **ClassLink > Xello > Home > The Real Game**. Build and save one Quick sim.

The Xello task is complete when the saved sim includes all three actions:

- ☐ add a career;
- ☐ add education; and
- ☐ add at least one expense, including student loans or a family member when selected.

Word bank: career/carrera · education/educación · expense/gasto · debt/deuda · tradeoff/ventaja y costo

CHOICE	WHAT I SELECTED	WHAT CHANGED IN THE PLAN?
Career		
Education		
Expense		

Complete frame: Adding **[choice]** changed the plan by **[effect]**. The tradeoff is **[benefit and cost]**.

My tradeoff explanation:

No-device learning scenario

Use this page only when your teacher assigns it because Xello is unavailable. It supports the same learning but does not count as Xello completion.

Jordan chooses a career that pays **\$4,200 per month before taxes**. Jordan adds a four-year education route with **\$320 per month in student-loan payments**. Jordan then adds **\$1,350 housing, \$520 transportation, \$550 food, and \$300 savings**.

CHECK	RESPONSE
Total of the listed monthly expenses	
Money left before taxes and other expenses	
Choice with the largest listed cost	
One cost not yet included	

One change Jordan could test in a second scenario:

The benefit and cost of that change:

Done when: the three Xello actions are saved and one tradeoff is explained, or the assigned no-device scenario is complete and the teacher has recorded a supervised Xello recovery need.
