

IT Salary Comparison and Career Fit Reflection Rubric

TEACHER USE

1sw/wk2-programming-it

Score the three Day 2 app records, the Day 3 comparison on page 4, and the Day 5 career-fit reflection together. Four criteria, 5 points each, 20 points total. Circle the descriptor that fits what the student actually submitted. Students analyze the supplied BLS table; they do not need to find three BLS pages.

Student: _____ Period: _____ Total: _____ / 20 Teacher initials: _____ Date: _____

CRITERION	1 - NEEDS IMPROVEMENT (2 PTS OR FEWER)	2 - APPROACHES (3 PTS)	3 - MEETS (4 PTS)	4 - MASTERS (5 PTS)
Career Records (three app careers)	Fewer than two careers have usable evidence.	Three careers are named, but pay labels, tasks, or preparation are mostly missing.	Three records include a task, preparation, and sourced pay; one label may be unclear.	All three records name the app, place, pay measure, date viewed, task, and preparation clearly.
Source Accuracy (app evidence and supplied BLS table)	Pay or growth claims have no source or confuse national median with local starting pay.	Sources appear, but at least two claims mix the place, measure, or years.	Claims use the correct source and measure; one label or limitation needs repair.	Each claim keeps its source, place, measure, and years; the student names a real limit of the data.
Comparison Reasoning (page 4)	No supported comparison is present.	Names a career but gives no accurate number or comparison.	Correctly identifies the highest median and fastest growth with numbers.	Correctly compares all three same-source careers, supports a choice with two facts, and explains a data limit.
Career Fit Reflection (page 5)	No career decision or supporting example is present.	A career is named, but the fit reason or evidence is missing.	All four prompts are answered with a specific example or fact.	The reflection uses a real trait or example, a career task or data fact, and an honest yes/no/not-sure decision.

Gradebook Conversion

SCORE	PERCENT	DISTRICT BAND
20	100	Masters
19	95	Masters

SCORE	PERCENT	DISTRICT BAND
18	90	Masters
17	85	Meets
16	80	Meets
15	75	Approaches
14	70	Approaches
13	65	Needs Improvement
12	60	Needs Improvement
11 or below	Below 60	Insufficient evidence / follow campus reassessment practice

Scoring notes. Record this as Minor 2 in the 1SW assessment map. When a source label is wrong, point the student back to the app record or the printed BLS source line and allow a correction before entering the score. Code.org completion is supplemental and is not scored.

Reteach triggers

- More than a third of students score 1 or 2 on **Source Accuracy**: model the difference between the app's local pay figure and the BLS national median before the next comparison.
- More than a third score 1 or 2 on **Comparison Reasoning**: model one comparison with two numbers from the same table before the next salary activity.
