Work That Can Build Toward Cybersecurity

These roles are examples, not a required ladder. People enter cybersecurity through different routes.

- **Computer User Support Specialist:** helps people solve computer problems.
- **Network and Computer Systems Administrator:** installs and maintains networks.
- **Information Security Analyst:** protects networks and systems and responds to risks.

Analyst snapshot (BLS): May 2025 U.S. median annual pay **\$129,180**; typical preparation is a bachelor's degree plus related experience, although other routes exist. Projected job growth is **21% from 2025 to 2035**, compared with about **3%** for all occupations.

Source: U.S. Bureau of Labor Statistics, Occupational Outlook Handbook, Information Security Analysts, checked September 24, 2026. The median is not Irving starting pay; growth is a projection, not a job promise.

Is Information Security Analyst an Emerging Career?

One job duty or preparation fact I noticed:

My judgment: This occupation **does / does not** show evidence of being emerging because its projected growth is ____% compared with about 3% for all occupations, and

One limit of this evidence: Circle one.

national, not Irving pay · projection, not guarantee · median, not starting pay

Sketch One Possible Route

Now: One skill I can practice in middle school is

High school: One Irving ISD option on FYF pp. 36-37 I want to investigate is

After high school: Circle one option I want to learn more about.

community college · 4-year college · industry training/certification · military training · work plus training

My current view: I am **interested / unsure / not interested** in cybersecurity because
