

# Community Classroom Learning-Space Plan

NAME \_\_\_\_\_ | DATE \_\_\_\_\_ | PERIOD \_\_\_\_\_

## Turn the FYF Brief into a Learning Plan

Start with FYF pp. 213-215. This companion is your individual planning surface. It does not replace the team poster.

**Third-grade science topic:** \_\_\_\_\_

**Learning goal:** Third graders will learn or be able to...

---

---

| EDUCATION CAREER                                      | WHAT THIS WORKER CONTRIBUTES OR PRODUCES |
|-------------------------------------------------------|------------------------------------------|
| Teacher                                               |                                          |
| Instructional coordinator/designer or museum educator |                                          |

### Student sequence:

1. First, students...

---

---

2. Next, students investigate, build, or test...

---

---

3. Finally, students explain...

---

---

**Language help:** learning goal = meta de aprendizaje | contribute = contribuir | investigate = investigar

**Complete frame:** The [career or role] contributes [specific work] so students can [learning result].

**Draw the Learning Space**

Label the entrance, investigation area, materials, discussion space, and one access or safety support. Show where the three student actions happen.

One design choice that supports the learning goal:

Booking Card and Revision

Write for a teacher deciding whether to reserve the space.

Space name and headline:

---

---

What students will do and learn:

---

---

---

---

Why one design choice supports learning instead of only decoration:

---

---

---

---

One access or safety need and the design response:

---

---

---

One useful feedback note and the revision I made:

---

---

---

---

**Complete frame:** I changed [part of the plan] because the feedback showed [evidence]. The change helps students [action] safely or accessibly.
