

Personal Budget and Career Evidence Portfolio Rubric

NAME _____ DATE _____ PERIOD _____

Four-Criterion Rubric

CRITERION	4 — MASTERS	3 — MEETS	2 — APPROACHES	1 — NEEDS IMPROVEMENT	0 — INSUFFICIENT EVIDENCE
Budget calculation and interpretation	All three salary-minus-target calculations and the revised monthly result are accurate, labeled, and interpreted with a realistic limit	Calculations and interpretation are mostly accurate with only a minor error	One calculation, label, or interpretation needs correction	Multiple calculations are missing, mixed, or unsupported	Blank, off-topic, or not submitted
Source and measure accuracy	Career and cost evidence consistently labels occupation, source, date, geography, measure, and limit	Labels are mostly accurate and comparable	One or more labels or comparisons need correction	Evidence repeatedly mixes incompatible or unsupported figures	Blank, off-topic, or not submitted
Three-career comparison	Three careers use one basis; transparent weights and evidence support a defensible preference	Three careers and the preference are mostly well supported	One career, factor, or evidence link is partial	Fewer than three comparable careers or unsupported ranking	Blank, off-topic, or not submitted
Financial decision and revision	Factor weights, career selection, revised monthly result, correction, and remaining limit form a clear evidence-based decision	Decision and revision are clear and mostly evidence based	One decision, correction, or limit needs stronger evidence	Decision is vague, judgmental, or unsupported	Blank, off-topic, or not submitted

Total: ____ / 16

Submission and Feedback

The score does **not** depend on family income, chosen career, budget surplus, lifestyle cost, platform access, art, accent, recording polish, or English mechanics unless meaning is unclear.
