DATE _____

PERIOD _____

Formative Feedback Guide

EVIDENCE CHECK	READY TO SHARE	REVISE NEXT
Career and source accuracy	All career facts keep the occupation, source, date, geography, and measure labels they need.	Repair one missing or mismatched label.
Design and revision evidence	The visible requirement test leads to one specific revision.	Add the evidence that caused the revision or make the change more specific.
Career and cluster connection	Three workers have distinct work, and the explanation shows how the roles connect.	Replace job titles alone with work products and a connection.
Supported explanation	The explanation uses specific design and career evidence and names one limitation.	Add a concrete fact, design detail, or honest limitation.

- ☐ Day 2 three-career comparison
- ☐ building design or equal paper concept
- ☐ test and revision record
- ☐ individual cluster synthesis

Tool choice, device access, drawing polish, accent, grammar unless meaning is unclear, group attendance, and public-speaking confidence do not determine the feedback.

Feedback: **Keep [specific evidence].** **Revise [specific gap] by [next action].**
