

Veterinary Career Route Comparison

NAME _____

DATE _____

PERIOD _____

Part 1: Build the evidence table

Use the Veterinary Career Evidence Guide. Keep every number with its measure and date.

EVIDENCE	VETERINARY ASSISTANT	VETERINARY TECHNICIAN	VETERINARIAN
One daily responsibility			
Typical entry education			
Credential or license note			
May 2024 U.S. median			
2024-34 growth			
Annual openings			

Part 2: Check the labels

- ☐ I wrote **U.S. median**, not starting pay or DFW pay.
- ☐ I kept the May 2024 date with the wage evidence.
- ☐ I did not claim that a high-school certification replaces a college credential or license.
- ☐ I used the same source basis for all three careers.

Part 3: Evaluate the trade-offs

SCENARIO A

Jordan wants to enter the field after high school, learn on the job, and keep future education open. Which route is the strongest current starting point? Use one responsibility, one education fact, and one realistic trade-off.

My recommendation: _____

Evidence and reasoning:

SCENARIO B

Sam wants to perform diagnostic tests and assist with clinical care but does not currently want the veterinarian's professional-degree route. Which career best fits? Use two facts and one realistic trade-off.

My recommendation: _____

Evidence and reasoning:

YOUR CURRENT ROUTE QUESTION

Which of the three routes would you investigate next? “None of these” is valid when you support it. Use two facts and one trade-off.

Word bank: preparation = preparación · openings = vacantes · trade-off = ventaja y costo

Frame: I recommend [career] because [fact 1] and [fact 2]; however, [trade-off].

My current answer: _____

One evidence-based reason:

One question I still need answered:
