

IT Salary Comparison Worksheet (Software Developer Model)

NAME _____ DATE _____ PERIOD _____

Career 1 is filled in for you as a model. Read it first. Then fill in Career 2 and Career 3 the same way. Career 2 is **Web Developer**. Career 3 is any other programming or IT career you want to know about.

My prediction, before I look anything up. The programming career that pays the MOST is _____ because _____

Compare the 3 Careers

The **H&L DFW Salary** row comes from your Day 2 notebook notes. The other rows come from the BLS page for that career.

FIELD	CAREER 1 (MODEL)	CAREER 2	CAREER 3
Career Name	Software Developer		
H&L DFW Salary (the range in the app)	About \$70,000 to start in DFW, and \$130,000 or more after 10 years		
BLS National Median (the pay row in Quick Facts)	About \$130,000 a year		
Typical Education (school needed to start)	Bachelor's degree (4 years of college)		
Job Growth Rate (the Job Outlook percent)	About 17%, much faster than average		

The model numbers are not forever. BLS changes them every year. Look at the live page. If your number is different from mine, cross mine out and write yours.

Median pay is not starting pay. The median is the middle of everyone in that career, not the first paycheck. That is why the model shows \$70,000 to start and about \$130,000 in the middle.

Notes From the BLS Page

FIELD	CAREER 1 (MODEL)	CAREER 2	CAREER 3
Number of Jobs (how many people do this now)	About 1.7 million in the United States		
What they do (one sentence from the What They Do tab)	Software developers design and build the computer programs and apps that people use every day.		
A DFW company that might hire this career	AT&T		

Think About Your Data

1. Which career has the HIGHEST salary? Name it, then write the number.

2. Which career has the FASTEST job growth? Are they the same career?

3. Check your prediction. Look back at the top of page 1. Were you right? What surprised you?

Hour of Code Reflection (fill in on Day 5)

1. The Hour of Code activity I did was

2. One programming concept I used was _____ and here is what it did in my code:

3. The IT career I favorited is _____ because

4. Can I see myself working in IT? Yes, no, or not sure, and why:
