

CyberSeek Cybersecurity Pathway

NAME _____ DATE _____ PERIOD _____

The CyberSeek map stacks cybersecurity jobs in four layers. You start at the bottom. Each layer up needs more years of work than the layer under it.

LAYER	YEARS OF EXPERIENCE	JOBS AT THIS LAYER
1. Entry-Level	0 to 3 years	Cybersecurity Specialist · Cyber Crime Analyst · IT Auditor
2. Mid-Level	3 to 7 years	Cybersecurity Analyst · Penetration Tester · Cybersecurity Consultant
3. Advanced	7 or more years	Cybersecurity Manager · Cybersecurity Engineer · Cybersecurity Architect
4. Senior	Top of the map	Chief Information Security Officer, called the CISO

Circle ONE entry-level job in row 1. That is the job you are tracing today. Then fill in your five steps.

My Five-Step Path

Step 1. Now. I am in 7th grade at _____ Middle School.

Step 2. High school, grades 9 to 12. The Irving ISD pathway I would take is _____ .

The certification I could earn in high school is _____ .

Step 3. After high school. Circle the one that fits your plan today:

community college · 4-year college · certifications only (CompTIA A+ and Security+) · military · direct to work

Step 4. My first job. The entry-level job I circled above is:

Step 5. Five years later. The mid-level job I want to reach is:

Certifications

Three certifications come up again and again in cybersecurity job postings: **CompTIA Security+**, **CISSP**, and **CEH** (Certified Ethical Hacker).

The one my job asks for: _____

One More Thing

Cybersecurity has far more open jobs than trained people to fill them. What does that mean for someone who starts now?
