

Transportation Survey Design

NAME _____

DATE _____

PERIOD _____

A fictional survey, not a real data collection

Do not collect names, addresses, phone numbers, schedules, or real responses. Design the questions only.

1. Define the problem

Choose one fictional audience:

- ☐ Students traveling to school
- ☐ Adults working evening shifts
- ☐ Older adults reaching appointments
- ☐ Residents without a car

Transportation need to investigate:

One Transportation career that could study or solve this need: _____

Evidence that person would need:

2. Check the models

Neutral multiple choice: How often would you use a bus that arrived every 20 minutes? Never / 1-2 days a week / 3-4 days / 5 or more days / Not sure

Leading non-example: Wouldn't a faster bus make your life much better? Yes / No

Useful short answer: What is one transportation barrier this fictional community should address?

Explain one defect in the non-example:

3. Draft seven multiple-choice questions

Write each question and its answer choices. Include “other” or “not sure” only when it closes a real gap.

QUESTION 1

QUESTION 2

QUESTION 3

QUESTION 4

QUESTION 5

QUESTION 6

QUESTION 7

4. Draft three short-answer questions

QUESTION 8

QUESTION 9

QUESTION 10

5. Hypothetical incentive

Incentive idea: _____

Why it might increase response:

This is a design idea only. Do not promise or distribute anything.

6. Quality check and revision

CHECK	YES	REVISE
Exactly 7 multiple-choice and 3 short-answer questions		
Neutral wording		
Complete, non-overlapping answer choices		
No unnecessary private information		
Clear connection to the fictional audience		

Question number revised: _____

What changed and why:

7. Connect evidence to work

Pattern this survey could reveal:

One recommendation a Transportation Needs Analyst could make:

Second Transportation career that could help: _____

How that career would help:
