

Drone Operation Decision and Readiness

NAME _____ DATE _____ PERIOD _____

Federal rule and campus safety are different checks

FAA guidance says Part 107 does not apply to operations conducted only indoors. Outdoor educational operations still require the organization to identify and follow an applicable legal operating route. Campus approval and the exact model SOP apply even when Part 107 does not.

1. Situation A: closed indoor gym

Location: _____

Does Part 107 apply to an indoor-only operation? ☐ Yes ☐ No

FAA evidence:

Campus/model checks still required:

Person authorized to stop the operation: _____

2. Situation B: outdoor middle-school lesson

Why “educational” does not automatically answer the rule question:

Organization status or operating route to verify:

FAA/district source or person to use:

3. Situation C: paid roof inspection

Likely starting federal rule: _____

Certificate or supervision evidence:

Other operation details that may still require approval or verification:

4. Remote Pilot Certificate sequence

Number the current first-time steps in order where an order exists. Mark recurring requirements with R.

STEP OR REQUIREMENT	ORDER / R	WHAT IT MEANS
At least age 16		
English proficiency		
Safe physical and mental condition		
Pass initial UAG knowledge test		
FAA application and TSA vetting		
Recurrent training every 24 calendar months		

One detail I would verify on the current FAA page before acting:

5. Indoor system readiness gate

Selected route: ☐ Live indoor microdrone ☐ Simulator ☐ Tabletop

CHECK	READY	STOP / FIX	EVIDENCE OR NOTE
Teacher/campus authorization confirmed			
Exact model SOP/manual available			
Aircraft/controller or simulation pieces intact			
Battery/charging condition checked when applicable			
Clear operating zone and spectator boundary			
One active aircraft/token per zone			
Connection/control check complete			
Immediate stop procedure understood			

Teacher-cleared route today: _____

One hazard found and correction made:

6. Apply the decision process

New fictional scenario: A community group asks students to fly outdoors at a park and record an event. The flight is called “educational,” and no one has identified the operating rule.

First decision:

Information still missing:

Authorized source or person:

Why an indoor safety checklist does not authorize this outdoor operation:
