

Civil Engineering Evidence Portfolio Rubric

NAME _____ DATE _____ PERIOD _____

Four-Criterion Rubric

CRITERION	4 — MASTERS	3 — MEETS	2 — APPROACHES	1 — NEEDS IMPROVEMENT	0 — INSUFFICIENT EVIDENCE
Current career/source accuracy	Career, salary, preparation, licensure, and pathway labels are accurate and bounded	Evidence is mostly accurate with complete source labels	Some labels or boundaries need correction	Claims are minimal or repeatedly overstate sources	Blank, off-topic, or not submitted
Assessment and emerging reasoning	Explains a pathway impact, verification need, emerging driver, and source limitation	Gives accurate impact and emerging evaluation	One part is partial or mostly descriptive	Gives unsupported/general claims	Blank, off-topic, or not submitted
Design, test, and revision evidence	Two options, comparable result, failure evidence, and justified revision are complete	Design/result/revision evidence is clear	One evidence stage is partial	Product is present without usable reasoning	Blank, off-topic, or not submitted
Career/pathway synthesis	Connects role, preparation, assessment, specialty, test evidence, and realistic next step	Makes accurate connections with evidence	Connections are partial or lightly supported	Mostly lists facts without connection	Blank, off-topic, or not submitted

Total: ____ / 16

Submission and Feedback

- ☐ career/preparation and systems evidence
- ☐ assessment and emerging-specialty decision
- ☐ bridge design/test/redesign record or equal fixed-data route
- ☐ weekly synthesis and pathway next step

Physical fabrication, team result, public speaking, H&L state, drawing polish, accent, and grammar unless meaning is unclear do not determine the score.
