

Engineering Week — Evidence Synthesis

NAME _____	DATE _____	PERIOD _____
------------	------------	--------------

Results Pattern

One pattern across anonymous bridge/sample results:

One exception or limitation:

The evidence—not a team ranking—that supports my claim:

FYF Mission to Mars — Fictional Transfer Brief

This is a workbook design scenario, not current NASA reporting. Identify environment constraints and label four component needs on a future rover concept.

Rover Tradeoff

Two constraints:

- 1. _____
- 2. _____

One design tradeoff and evidence behind it:

How the same define-test-revise cycle appears in the bridge and rover tasks:

Weekly Synthesis

Selected engineering career and accurate preparation fact:

Assessment and possible impact on my goal:

Emerging specialty and evidence that qualifies it:

Bridge result and supported redesign:

Pathway Next Step

MacArthur public page label: **Engineering**

2026–27 coursebook label: **Civil Engineering**

How this high-school pathway can support preparation without completing the bachelor’s/licensure route:

One exact question I would ask a counselor or current program contact:
