

Construction Labor Evidence and Classification

NAME

DATE

PERIOD

Published Course Rule and Fixed Evidence

These are classroom comparison labels, not official government designations.

- **High-skill:** documented apprenticeship, moderate/long-term OJT, bachelor's degree, or regulated license/credential boundary.
- **High-wage:** May 2024 U.S. median above \$49,500.
- **High-demand for this comparison:** 2024–34 growth above 3.1%.

OCCUPATION	U.S. MEDIAN	GROWTH	ANNUAL OPENINGS	PREPARATION SUMMARY
Construction Manager	\$106,980	9%	46,800	Bachelor's typical
Carpenter	\$59,310	4%	74,100	HS diploma; OJT or apprenticeship
Construction Equipment Operator	\$58,320	4%	46,200	HS diploma; occupation-specific OJT
Masonry Worker	\$56,600	2%	20,700	Occupation-specific OJT; route varies

Source basis: May 2024 U.S. medians and 2024–34 national projections, BLS. Annual openings include replacement needs and do not prove a DFW shortage.

Construction Manager

High-skill? YES / NO — exact preparation evidence:

High-wage? YES / NO — exact salary evidence:

High-demand? YES / NO — exact growth evidence:

One limitation or claim the data does not prove:

Carpenter

High-skill? YES / NO — exact preparation evidence:

High-wage? YES / NO — exact salary evidence:

High-demand? YES / NO — exact growth evidence:
