

Fictional Water-Line Response Plan and Briefing

NAME _____

DATE _____

PERIOD _____

Safety Boundary and Team Jobs

This is a paper/digital communication simulation. Students do not locate utilities, enter a street, direct traffic, shut a valve, excavate, select repair materials, use tools, or write real water-main repair instructions.

Actual response belongs to authorized city/utility personnel and qualified tradespeople following current local procedures.

Team jobs:

- **Safety and communication lead:** records who must be alerted and how people stay outside the supplied hazard area.
- **System-evidence lead:** records the supplied evidence and what the team cannot conclude.
- **Plan and record lead:** sequences the classroom response and documents changes.

My role: _____

What my role produces for the next person:

One decision our team is not authorized to make:

Mark the Fictional Site Plan

Use the supplied FYF diagram as context. On this page, sketch or place only communication and safety-planning evidence:

- supplied street/building boundaries
- supplied water-line location
- supplied visible hazard area
- protected public boundary
- authorized contact/coordination point
- evidence-record location

Do not add a dig location, repair cut, valve operation, traffic-control instruction, or material choice.

Before, During, and After Priorities

BEFORE AUTHORIZED TECHNICAL WORK

Who is alerted, how people are protected, and what evidence is recorded:

DURING THE AUTHORIZED RESPONSE

How the team communicates changes without directing technical work:

AFTER THE AUTHORIZED RESPONSE

What record, update, or follow-up is passed to the next role:

Twist: Crowd and Time Pressure

The supplied scenario adds bystanders and pressure to move faster.

What changes in the communication plan:

What does **not** change because it protects people and evidence:

One pressure-driven shortcut the team rejects and why:

One qualified role who owns a technical decision:

30–45 Second Individual Briefing Planner

1. **Priority:** what must happen first in the classroom plan?

2. **Evidence:** which supplied detail supports that priority?

3. **Role:** which A&C worker or authorized authority owns the next work product or decision?

4. **Boundary:** what can the image/scenario or student team not decide?

Approved route: live / teacher conference / audio / recorded media / equivalent written or AAC response
