Fixed Same-Household Evidence

MIT Living Wage Calculator, one adult/no children, 2,080 hours/year, updated February 15, 2026:

LOCATION	HOURLY LIVING-WAGE RATE	REQUIRED ANNUAL INCOME BEFORE TAXES
Tulsa County, Oklahoma	\$21.23	\$44,165
Dallas County, Texas	\$23.31	\$48,489
Los Angeles County, California	\$28.92	\$60,161
New York County, New York	\$38.21	\$79,469

These figures hold the household scenario constant. They do not provide the local salary for one occupation, predict every person's expenses, or include the student's preferred household.

My selected career salary and its exact source label:

Dallas County

Required annual before-tax target: \$48,489

Selected career salary: \$ _____

Career salary – cost target = \$ _____

[] above target [] below target [] not comparable because: _____

What the difference suggests:

One missing factor:

Comparison Location 1

Location: ☐ Tulsa County ☐ Los Angeles County ☐ New York County

Required annual before-tax target: \$ _____

Selected career salary: \$ _____

Career salary – cost target = \$ _____

☐ above target ☐ below target ☐ not comparable because: _____

What the difference suggests:

One missing factor:

Comparison Location 2

Location: ☐ Tulsa County ☐ Los Angeles County ☐ New York County

Required annual before-tax target: \$ _____

Selected career salary: \$ _____

Career salary – cost target = \$ _____

☐ above target ☐ below target ☐ not comparable because: _____

What the difference suggests:

One missing factor:

Relocation Judgment for Fictional Jordan
