Scenario Rule and Buyer Evidence

This is a fictional workbook decision model. Supplied costs and value increases are not contractor bids, appraisals, financing advice, tax advice, or a promise of profit.

Buyer evidence:

- modern kitchens and updated bathrooms;
- outdoor living space;
- clean, open layouts;
- expensive features do not always increase final sale price.

Formula: **estimated value increase – cost = net value change**

One decision rule our plan will use:

One real-world factor this model leaves out:

Upgrade Evidence Table

UPGRADE	COST	VALUE INCREASE	NET VALUE CHANGE	BUYER-EVIDENCE FIT
Kitchen refresh	\$10,000	\$15,000		
Bathroom update	\$6,000	\$8,000		
Open floor plan changes	\$8,000	\$10,000		
Backyard patio	\$7,000	\$9,000		
Landscaping upgrade	\$3,000	\$4,000		
Luxury closet upgrade	\$5,000	\$3,000		
Designer lighting package	\$4,000	\$4,500		
Smart-home tech package	\$9,000	\$6,000		

Which two rows need the most caution, and why?

My Selected Renovation Plan

SELECTED UPGRADE	COST	VALUE ADDED	NET CHANGE	BUYER-EVIDENCE REASON

Total cost: \$ _____ (must be \$25,000 or less)

Total estimated value added: \$ _____

Total net value change: \$ _____

Strategy, Tradeoff, and Limit

Why the selected upgrades fit the supplied buyers:

One upgrade we rejected and the tradeoff:

Why a positive scenario result does not prove real profit:

One qualified professional or source still needed:

Entrepreneurship Connection

Opportunity created by the scenario:

Two owner/investor responsibilities:

1.

2.

One financial or ethical risk:

How this decision is similar to and different from an earlier entrepreneurship project:
