

# TREC Sales Agent Route and Variable-Income Math

NAME \_\_\_\_\_

DATE \_\_\_\_\_

PERIOD \_\_\_\_\_

## Current TREC Sales Agent Route

Number the current actions in a defensible order.

| ACTION                                                   | ORDER |
|----------------------------------------------------------|-------|
| Meet qualifications, including age 18+                   |       |
| Complete 180 classroom hours across six required courses |       |
| Submit application and education documents               |       |
| Complete fingerprint/background requirements             |       |
| Pass state and national exam portions                    |       |
| Receive inactive status after requirements are met       |       |
| Obtain licensed-broker sponsorship for active practice   |       |

The six required 30-hour course blocks: Principles I, Principles II, Law of Agency, Law of Contracts, Promulgated Contract Forms, and Real Estate Finance.

One cost, provider, time, or rule detail to verify when applying:

Worked Fictional Commission Model

This is classroom math—not a standard or guaranteed agreement.

- Sale price: \$350,000
  - Fictional brokerage-side commission: 2.5%
  - Fictional agent split: 60%
1.  $\$350,000 \times 0.025 = \$8,750$  gross brokerage-side commission.
  2.  $\$8,750 \times 0.60 = \$5,250$  fictional agent gross before taxes and business expenses.

Why is \$5,250 not guaranteed take-home pay?

---

---

---

---

---

---

What agreement/timing detail is still missing?

---

---

---

---

**Fictional Scenario A**

---

Sale price: \$280,000 · supplied brokerage-side rate: 2.0% · supplied agent split: 65%

Gross brokerage-side commission: \$ \_\_\_\_\_

Fictional agent gross before tax/expenses: \$ \_\_\_\_\_

Show the calculation:
