PERIOD _____

Design Boundary and Goal

Design a fictional classroom activity for young children. It must practice:

- gross motor: balance on one foot for 5 seconds;
- fine motor: cut along a straight line with scissors.

Use classroom-safe materials and teacher-approved scissors. Offer a seated or supported balance route and a pre-cut/tear/fine-motor alternative when needed. A child's ability is not a score of effort or worth.

Theme and activity name:

The learning goal in child-friendly words:

Instructions a Child Can Follow

First:

Next:

Then:

How the balance skill is practiced safely:

How the cutting or equal fine-motor skill is practiced safely:

Draw or Map the Activity

Label materials, where the child moves, where the child cuts/creates, and one access or safety support.

Test, Observe, Revise

Route used: partner test / tabletop walk-through / teacher conference / individual written simulation

What the tester understood immediately:

Where the directions or materials caused confusion:

Revision 1 and why it helps:

Revision 2 and why it helps:

Why Service Matters

Community service is unpaid work intended to benefit a community. Do not invent or disclose private service records. You may analyze a real experience, a planned experience, or the supplied tutoring scenario.

Experience or scenario:

Specific skill developed and evidence:

How that skill transfers to two careers:

Why the service benefits both the community and the volunteer:
