Band Identity and Audience

This is a fictional brand. Use original names, symbols, and text. Do not copy a real band logo, album art, copyrighted character, or trademark.

Band name: _____

Music style or genre: _____

Audience and what matters to them:

Visual style, stage look, and overall message:

Five Design Principles

3-Second Rule — one main idea:

Visual hierarchy — what appears first and why:

Font choice — readable style and reason:

Memorable design — original repeating symbol or shape:

Fit the vibe — how the parts belong together:

Sketch Option A

Label type, symbol, color/value contrast, and the intended first look.

One strength and one risk:

Sketch Option B

Make a meaningfully different hierarchy or symbol choice.

One strength and one risk:

Select, Build, and Test

Selected option and why it fits the audience:

Route: Canva / Adobe Express / paper / other approved accessible route

3-second test: what the viewer noticed first:

One revision based on the test:

Career and Resume Connection

Current BLS evidence: Graphic Designers create visual concepts that communicate ideas; the May 2024 U.S. median annual wage was \$61,300, typical entry-level education was a bachelor's degree, projected growth was 2% for 2024-34, and about 20,000 annual openings were projected. These are national occupation measures, not DFW starting pay or a guarantee.

One designer duty demonstrated here:

One portfolio/resume bullet using action + task + result/purpose:

One evidence limitation or future question:
