Entrepreneurship Boundary and Skill Evidence

Entrepreneurship involves identifying an opportunity and organizing resources to offer value while accepting responsibility and risk. This is a fictional plan. Students do not sell, contact clients, collect payment/data, promise results, or use a real address/account.

Three real skills or interests and evidence that each is true:

Selected skill and person/problem it could help:

Service and Customer Need

Fictional service name: _____

Specific deliverable the client receives:

Customer need and how the service responds:

One boundary—what the service will not claim or do:

Mission, Price Scenario, and Add-On

Mission statement: who is served, what is provided, and why

Fictional price and unit: _____

Supplied cost/time assumptions used to explain the price:

Optional add-on and its extra time/cost:

Why this is classroom math rather than a real market price or income promise:

Original Brand Sketch

Create an original mark. Do not copy a real logo, mascot, character, or trademark.

Colors/shapes/type and what they communicate:

Opportunity, Responsibility, and Risk

One opportunity and supporting evidence:

Two owner responsibilities:

One risk or uncertainty:

One qualified adult/source a real entrepreneur would consult:

Private Evidence Pitch and Revision

Use a teacher conference, audio, recorded media, AAC, or equivalent written route. This week does not claim the oral-presentation TEK.

30-45 second / 4-6 sentence evidence pitch:

Feedback or self-check:

One revision and why:
