

Veterinary Pathway Recommendation

NAME _____

DATE _____

PERIOD _____

Decision question

Should a fictional student with an interest in animal care investigate the **Animal Science** opportunity described for Nimitz in *Find Your Future*? Use the week's career, pathway, triage, and skill evidence. A supported “not yet” or “no” can earn full credit.

1. Choose the current career route

Veterinary Assistant · Veterinary Technician · Veterinarian · Another animal career · Not sure yet

My current route: _____

One daily-work reason:

One education or credential trade-off:

One May 2024 U.S. median or 2024-34 outlook fact:

2. Map the transition

One Nimitz Animal Science opportunity from FYF pp. 100-101 that matters to this student:

One middle-school action that can help the student prepare for high school:

One postsecondary requirement the student would still need after high school:

3. Use evidence from this week’s work

What the triage case showed about critical thinking:

One transferable skill from the Week 1 skill bank and how it appears in the career:

4. Make the recommendation

My recommendation: Investigate next · Keep as one option · Choose a different route

Word bank: pathway = trayectoria · credential = credencial · postsecondary = después de la preparatoria · next step = próximo paso

Frame: I recommend [route] because [evidence]. FYF shows [pathway fact]. After high school, the student would still need [requirement]. A useful next step is [action].

Write four sentence jobs:

- 1. State the recommendation and the career route.
- 2. Use one education, wage, outlook, or openings fact with its label.
- 3. Connect one FYF pathway fact and one skill or triage example.
- 4. Name one useful next action and one requirement that still comes after high school.

Submission check

- ☐ Career fact uses the correct source, date, and measure.
- ☐ FYF pathway fact does not promise a credential or outcome.
- ☐ Middle-school, high-school, and postsecondary steps stay in the correct order.
- ☐ Critical-thinking or transferable-skill evidence is specific.
- ☐ Recommendation includes a trade-off and a next step.
